DATA ANALYST

Summary

Data analyst with nearly 2 years of experience in data analysis focused on financial market with emphasis on process optimization. I have experience in data visualization tools, ETL procedures, and programming languages such as Python, JavaScript, and database query language SQL. I am proficient in Tableau, Alteryx, and Excel.

I can speak Portuguese (native), English (fluent), and Russian (basic) with experience in working with foreigners.

I have work experience in the largest bank in Latin America and have created projects for the bank's operations board using the following technologies: Tableau, Alteryx, and SAS with the main goal being tracking the evolution of projects and profits generated by the exemption of commercial time.

Available for immediate start.

Skills

Languages, Frameworks and Databases

- Python, JavaScript, Alteryx, Excel
- SQL, CSV, Access, SAS, Data Lake, Data Mesh

Governance

- Kanban, Agile Scrum, GIT & GitHub, Lean 6 Sigma (White belt)

Project participation:

- Strategic dashboard for business projects (Alteryx, Tableau, Excel, SAS, Access)

Focused on showing the bank board about the ongoing exemption projects evolution for the business projects tracks.

- Tactic process adherence (Alteryx, Tableau, Excel, SAS, Access)

For the new business opening and maintenance accounts process on management level.

- Tactic SLA dashboard (Alteryx, Tableau, SQL server, Json, Access, Excel, csv)

Focused on providing teams with the SLA of their projects on the bank. I did the inclusion of products doing all the extraction, cleaning, loading, and analysis of data while collaborating with internal clients and understanding their needs of monitoring indicators to implement them on dashboards.

Professional Experience

Data Analyst

Itaú (financial institution) | Mar 2023 to Apr 2024

- Data Lake management, ETL pipeline implementation for data standardization and dashboard usage, project data analysis, fixing bugs on the pipeline.
- Dashboard creation for new products at tactical and strategic business levels.
- Fast learning: I have studied and implemented within a month the prototype of a dashboard of profits generated by the exemption of commercial time specially tailored to the board of operations. I have also done lots of projects from zero and worked in ongoing projects learning how they work and implementing new and better features. I have great focus, when studying I can recall everything from what I have studied, and I love to learn.

Process Engineer

Itaú (financial institution) | Sep 2022 to Mar 2023

- Process mapping, KPI's analysis, improvement opportunities search for the production tracks with emphasis on data analysis.

Front-end developer

Mindbeat (startup) | Sep 2021 to Sep 2022

- Building and modifying responsive interfaces, finding, and fixing bugs.
- Create or upgrade software functionalities using JavaScript in Ruby on Rails applications made for the pharmaceutical industry collaborating directly with clients. Codes were revised constantly with high performance expectations.

Main clients: Pfizer, AstraZeneca, and Novartis.

Education

Systems analysis and development from Jan 2017 to Dec 2019

FATEC Campinas

Bootcamp – Data Analyst from May 2020 to Jul 2020

IGTI

Bootcamp – Process Engineer from Sep 2022 to Nov 2022

Itaú Bank
